

# Holographic Touch™ Demos & Prototypes

## SEEING IS BELIEVING

Holographic Touch™ from Holo Industries is a practical and easy-to-implement contactless solution being used by dozens of the world's leading companies.

With this disruptive new technology, users can safely access data, watch videos, swipe, scroll, spin — even sign their name for transactions — in mid-air.

You have to see it. That's why Holo Industries has developed plug-&-play demos that work right out of the box. Simply unpack your demo from its convenient carrying case, connect to a smart terminal or your PC via HDMI and USB cables, and everything you see on the screen becomes a mid-air interactive holographic image.

One touch, and we promise you'll be a believer.

### Plug & Play

Holo's demos work out-of-the-box. Connect to your smart terminal or PC via HDMI and USB cables and instantly display images or videos as a clear holograph. Operating Systems include: Windows, Linux & Android

### Scalable

Holographic Demos are available in 200mm, 250mm, and 310mm, and in in two formats for either vertical (for kiosks) or horizontal (for counter-tops) applications.

### Accurate & Responsive

All systems are accurate to 2mm, with zero latency. Pinch to enlarge, zoom, scroll and swipe. Fully functional in hot and cold weather, day and night — even with gloves on!

# Demos & Prototypes

## Features, Benefits & Models

### FEATURES

- Operates under bright lights or in the dark
- Fully functional outside in rain or snow
- Windows, Linux or Android OS
- Available in 120V or 240V
- Rugged design
- Temperatures range: -10°C to +55°C
- Humidity range: 5% to 95%
- Audio: Built-in speaker (optional)
- Touch points: 2
- Resolution: 1 mm
- Response time: 50ms (average)
- UL and CE Certification: In process

### BENEFITS

- Easy to install and operate
- Contactless and germ-free
- Constructed of light, durable composites
- Select from a variety of colors
- Available in three sizes: 200mm, 250mm and 310mm
- Optional features such as Wi-Fi, NFC Card Readers, etc.
- Tamper-proof and scratch-resistant screen.
- Less clean-up: no direct contact = no fingerprints or smudges
- Packaged in a lightweight, durable carrying case.
- Made in the USA

The illustration on the right shows a 200mm demo connected to a touch screen via HDMI and USB cables.

Customers can select from these demo sizes:

- 200mm
- 250mm
- 310mm

The demos are packaged in carrying cases and come with USB and HDMI cables and power supply. The standard enclosure color is black, but custom colors can also be ordered.

Customers can also order a pre-programmed demo or additions such as an NFC Card Reader, Wi-Fi, etc. Please contact us and we will be happy to quote you.

Top, left to right: 200mm demo, 250mm red custom demo, 310mm programmed demo without and with NFC Card Reader.
