

Holographic Touch™ Integrated Solutions

TOUCH DISPLAYS ARE
YESTERDAY'S TECHNOLOGY.

Businesses everywhere are investing in contactless technologies, and Holo Industries' mid-air Holographic Touch™ is a practical and easy-to-implement solution already being used by dozens of the world's leading companies.

From touchless ATMs, holographic menus, and contactless lavatory devices, to mall maps and transportation routes, our Holographic Touch is being utilized in ever-increasing applications.

Holo Industries manufactures and designs custom integrated solutions for customers so they can quickly see their applications transformed from touch into a new holographic reality.

WELCOME TO THE FUTURE.

Plug & Play

Holo's products run on Windows, Linux or Android systems. Use HDMI and USB cables to connect to smart terminals or PCs to instantly display images or videos as a clear holograph.

Scalable

Holographic systems are available in sizes from 50mm to 630mm,* and can be displayed in either vertical (for kiosks or wall-mounted displays) or horizontal (for counter-top or other surfaces) formats.

Accurate & Responsive

All systems are accurate to 2mm, with zero latency. Pinch to enlarge, zoom, scroll and swipe. Fully functional in hot and cold weather, day and night — even with gloves on!
